OSA-0669-69

4 JUL 1969

MEMORANDUM FOR: Comptroller, DD/S&T

SUBJECT: Unfunded FY 1969 CIA Fund Requirements

REFERENCE: Memorandum for Director of Special Activities from Deputy Director for Science and Technology dated 24 February 1969, Subject: Status of Funds, FY 1969 (DD/S&T-723-69)

1. The only known OSA requirements at this time for additional funds in FY 1969 are as follows:

25X1A

a. VHF Ground-communications systems for [redacted]
This system is a new requirement that has been fully justified in correspondence from the Detachment Commander. The item will be required in FY 70 if not funded in FY 69. Early funding is desirable because it is a current operational need. Requisitions could be submitted within two weeks.

b. Two [redacted] (Photo transmission and data storage system) units for [redacted] Signal Center installation [redacted]
This is a new requirement for increased resolution of weather charts and photos transmitted from WECEN to OSA, and would replace the present [redacted] equipment. Funds will be required in FY 70 if not available in FY 69. FY 69 funding is desirable in order to make the service available at an earlier date. Requisitions could be submitted within two weeks if approved.

2. The above items are not contained in either the FY 70 or FY 71 OSA Budgets.
